

I have recently leased a car with XM radio in it. This is the best thing tht happened in this area since they came up with FM. It gives you a large variety of high quality programing. Local radio is mediocre at best. I enjoy talk shows and locally there is very limited offering except sports that I am not interested in. I like classical music, there is no local clasical music station. XM has three.
Please do not take it away from me.
